I am a professional Front-end Developer with an experience of 2+ years under my belt. I started programming from the age of 15, fascinated by the fact how a little piece of code can change human life to that extent. My core expertise are HTML, CSS, JavaScript, jQuery, ReactJS, and MERN Stack Development. Apart of my technical skills I am a self-taught Pianist.

I am always in the search of a platform where I can utilize 100% of my skills and learn new things.

EDUCATION
